

DT2112 home exam overview

Overview

The exam consists of questions in five areas: ASR and perception, speech synthesis and production, dialogue, data collection and evaluation.

For each area, there are three assignments: one level E assignment, one level C assignment, and one level A assignment – 15 assignments in all. The minimum requirement to pass the course is 5 passed assignments at the E-level. No assignment should require more than 1/2-1 page to answer. Precise, concise and accurate answers may often be shorter than that.

The home exam is an individual test, and you are not permitted to discuss the questions or their responses until the test has passed its deadline in June.

Scoring

Each assignment scores a maximum of 4 points. The assignments come with a clear listing of where the points are earned. For each item that is listed as giving a point, you are required to provide an unmistakably larger amount of correct statements than incorrect in order to get the point.

Grading criteria

The grading criteria for each grade from E through A are listed in the table below. The grading is counted in terms of number of passed assignments per level. The number of required passed assignments increases with the grade. In addition, the point requirement to pass an individual assignment is higher for higher grades.

For example, in order to achieve an E grade, you need only pass all level E assignments, and an individual assignment is considered passed if a score of 2/4 is achieved. The minimum requirement for an E, then, is a score of no less than 2 on each of the five E-level assignments.

For a C, all E-level assignments must be passed with a score of 3/4. In addition, 4 out of 5 C-level assignments must be passed, also with a score of 3/4.

For an A, all E-level and all C-level assignments and 3 out of 5 A-level assignments must be passed with a score of 3/4.

The home exam counts for 50% of the final grade of the course and the project for the other 50%. Naturally, all course parts that are graded pass/fail must also be passed.

The table below lists the requirements per assignment level for each grade. The number before the slash is the score required to pass an individual assignment, the number after the slash is the number of passed assignments needed for that level.

		Grade achieved				
		E	D	C	B	A
Assignment level	E	2/5	2/5	3/5	3/5	3/5
	C	-/-	2/2	3/4	3/5	3/5
	A	-/.	-/-	-/-	3/2	3/3
